

Amendments to the Claims

Please replace the prior listing of the claims with the following:

11. (Currently amended) A fluid disruption and storage apparatus comprising:
a first container having a first chamber capable of being filled with a fluid,
a second container having a second chamber adapted to receive fluid from said first chamber, the second container having a piston ~~means~~ slideably receivable within said first chamber of said first container, wherein said piston ~~means~~ has a bore which fluidly communicates with said first and second chambers and said bore has a first portion having a first diameter, and a second portion having a second diameter which is smaller than said first diameter, wherein, on insertion of said piston ~~means~~ into said first chamber of said first container, fluid is displaced from said first chamber to said second chamber.
12. (Currently amended) A fluid disruption and storage apparatus as claimed in claim 11, wherein said piston ~~means~~ and said second container are integrally formed.
13. (Previously presented) A fluid disruption and storage apparatus as claimed in claim 11, wherein said first portion is adjacent said second chamber and said second portion is remote from said second chamber.
14. (Previously presented) A fluid disruption and storage apparatus as claimed in claim 11, further comprising a sealing means adapted to seal said first and second containers together.
15. (Previously presented) A fluid disruption and storage apparatus as claimed in claim 11, wherein said first and second containers are adapted to seal together as the fluid is displaced to said second chamber.
16. (Previously presented) A fluid disruption and storage apparatus as claimed in claim 11, wherein at least one portion of said second chamber is adapted to allow fluid to be removed therefrom.

17. (Previously presented) A fluid disruption and storage apparatus as claimed in claim 11, further comprising cutting means adapted to remove a part of said apparatus such that the stored fluid may be removed from said second chamber.

18. (Previously presented) A fluid disruption and storage apparatus as claimed in claim 11, wherein said fluid storage apparatus is disposable.
